ESTABLISHMENT OF SPECIFIC TECHNICAL GUIDELINES FOR REINSTATEMENT OF ECONOMIC ACTIVITIES SARS-CoV2 (COVID-19)

In accordance with our previous newsletters regarding the suspension of non-essential activities from March 31 to May 30, 2020, declared by the Federal Government of the United Mexican States ("Mexico") as consequence of the pandemic provoked by the virus SARS-CoV2 (COVID-19), we hereby inform you that on May 29, 2020 the Ministry of Health issued a Statement establishing the Specific Technical Guidelines for Reinstatement of Economic Activities, which includes, among others, the following indications:

1. As of June 1, 2020, the "New Normality" stage begins, during which **all workplaces must adopt the mandatory measures for reinstatement or continuation of activities.**[1]

2. All essential activities are obliged to **carry out the online self-testing checklist** via http://nuevanormalidad.gob.mx/.

3. During the New Normality, filing the self-testing checklist will be a support tool in order for workplaces to comply with the measures established by the guidelines, provided that **it will not be required to obtain a previous authorization in order to restart or continue operations.** However, compliance with the referred measures may be verified and, if applicable, sanctioned through inspection visits from the corresponding authority.

4. Non-essential activities may start operations on a differentiated basis, for which **the possibility and level of operation will be determined by: a)** the state of the weekly traffic light of epidemiologic risk by regions[2]; and **b)** the chart of epidemiologic risk levels.

5. For the purposes of the abovementioned, workplaces must identify: **i)** the type of activity (essential or non-essential); **ii)** the level of epidemiologic risk at the location of the workplace; **iii)** the size of the workplace[3]; and **iv)** the characteristics of the workplace. Once these are identified, **the possibility and degree of operation will be determined in accordance with the location of the workplace at the chart of epidemiologic risk levels.**[4]

6. Domiciliary safeguard for vulnerable groups must be kept during the maximum-level alert.

June 1, 2020.
